

STRAW ROCKETS

- Color your straw rocket,
- Cut it out
- Use 2 glue dots to attach a sealed straw portion to the back of your rocket (sealed edge at the top end of your rocket).

- Insert the long straw into the sealed straw on the back of your rocket.
- Blow and watch it go!
- Experiment with different angles and adjust how hard you blow to find the best way to shoot your rocket.
- Have a race with your playdatebox partner to see whose rocket can go the highest, farthest, fastest?
