KETTLE CORN

- 3 Tablespoons Coconut Oil or vegetable oil.
- 1/3 cups granulated sugar
- 1/2 cup unpopped popcorn kernels
- 1 teaspoon vanilla powder

Get out a large bowl to hold the finished popcorn. Dump all of the ingredients together into a popcorn popping pan with a turning handle on the lid. (Find one on Amazon). " Put the lid on the pan and put it on the stove. Turn the handle continuously until there are a few seconds between popping sounds.

Quickly dump your kettle corn into a large bowl to cool.

Note: You can make this recipe in a regular lidded pan on the stove, but you will have to shake the pan VERY vigorously to keep the sugar from scorching. Remove from heat and dump finished popcorn into a bowl immediately!
